18. USB2.0 for WiFi Adapter

1. Set up a network connection

Reference8 Pro has both wired and wireless models connected to the router. Wired connection via the RJ45 ETHERNET port, a network cable connected directly to the router. Wireless connection needs to be done once set up, in the future each boot can automatically connect with the router.

The first wireless settings, you need to use on a network cable from RJ45 ETHERNET port to the router. Plugged WiFi adapter and power on more than 30 seconds. Let the cell phone or computer connected to the same network. Open the browser in Apple systems or Google browser in windows. Write opera.local/ to enter user interface. If use Android system please download the dedicated "Opera APP" (.....link).

Entering the user interface (pic1) then press the  button and choose the NETWORK option (pic2).

pic 4

pic 5

When you see these information (pic5) remove the Ethernet wire and turn power off.

2. How to play

1. Plug in USB memory (U disk or hard disk) remaining on the USB2.0 port. Tune on about 40 seconds and make sure the cell phone (Pad or computer) is connected to the same network. Open the browser, enter "opera.local" into the interface (Android system please download the dedicated "Opera APP" (...link).

2. First enter the  option (pic6). You can find the music album folders and tracks from four different options: Music Library, Artists, Albums and Genres in local USB memory. If the NAS is connected to the network you can also browse it. There are many Internet radio stations to choose from in "WEBRADIO". You can also add your own stations.

pic6

3. When you found the music, in the far right of the folder or track name has a  button. Album folder has 4 modes: Play or Clear and play (direct playback), Add to queue and "Add to playlist". Track added a "Add to favourites " mode.

pic7

pic8

4. In  Queue, you can see different playlist. It has 4 playback modes:  random play,  loop,  save playlist and  cancel playlist.

pic9

pic10

5. Web Radio have five options (pic11). You can add the Radio station in “My Web Radio” (pic12, pic13). When you enter any options you can select playback mode (pic14).

pic11

pic12

Pic13

pic14

6. When you plug DVD Rom to R8pro, you can direct play CD (pic15, pic16).

pic15

pic16

You also can Rip CD to the memory. The memory should renamed "OPERA" in computer. (pic17~19)

pic17

pic18

pic19
